<sup>&</sup>lt;sup>1</sup> Starting in 1989, contracts issued to Tribal organizations for the construction of health facilities by the Office of Engineering Services are included in the contracts category. Contract awards also include those issued by IHS Area Offices and IHS Headquarters and exclude purchase orders below \$25,000. Includes new contracts and contract modifications.

NOTE: Contract report completed as of April 4, 1995. Grant report completed as of April 4, 1995. SOURCE: For Contract Data: 1988 to present, PHS Contract Information System, Room 18–50, Parklawn Bldg., 443–4759, prior to 1988, the IMPAC Data System run by NIH for PHS, and For Grant Data: PHS Grants Data System.

<sup>&</sup>lt;sup>2</sup> Project grant obligations shown for first time in FY 1981. During 1987 and 1988, IHS Scholarship Program funding was reported under contracts rather than grants. The IHS Loan Repayment Program was initiated as a contract program starting in 1988. Both the IHS Scholarship and the IHS Loan Repayment programs were converted to grant programs in 1989. Includes Urban Indian Health Program grants that were first awarded in 1991. Includes Tribal self-governance compact grants that were first awarded in 1993. Includes self-governance cooperative agreements and self-governance compacts starting in 1994.

Chart 5.2
Indian Health Service
Tribal Health Contract
and Grant/Compact
Awards by Type, FY 1994

The \$586.6 million reported under the P.L. 93–638 Contracts category for FY 1994 comprised 77 percent of the total Indian Health Service contract and grant/compact awards for Tribal health.

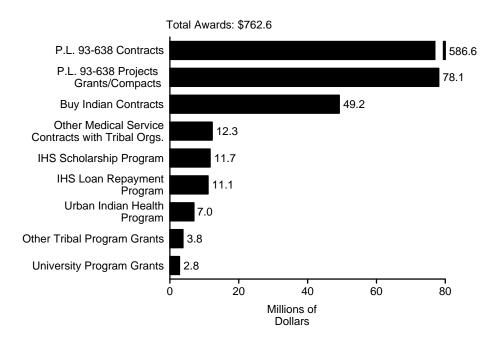

Table 5.2

<sup>&</sup>lt;sup>2</sup> Includes medical service contracts with American Indian/Alaska Native managed organizations (solicitation procedure code 4K).

<sup>&</sup>lt;sup>3</sup> Includes Tribal management grants, health service delivery grants, self-governance cooperative agreements, and self-governance compacts.

<sup>&</sup>lt;sup>4</sup> Urban Indian Health Program grants.

<sup>&</sup>lt;sup>5</sup> Includes grants for mental health, child abuse, Tribal research, Tribal matching scholarships, adolescent health, Tribal recruitment/retention, other special projects and Alaska Area specific grants.

<sup>&</sup>lt;sup>6</sup> Includes grants to universities that conduct recruitment and training programs.

NOTE: Contract report completed as of April 4, 1995. Grant report completed as of April 4, 1995. SOURCE: PHS-Contract Information System, Rm. 18–50, Parklawn Bldg., 443–4759, and the PHS Grants Data System

Chart 5.3 *Urban Indian Health Program Workload and Appropriation* 

The appropriation for the Urban Indian Health Program has increased 132 percent since FY 1984. Although the workload increased 123 percent during this time period, this is at a greater rate than the appropriation when inflation is taken into account. In FY 1993, the appropriation for this program was \$20.9 million, and there were nearly 785,000 patient encounters.

Chart 5.18
Trend in Average Daily
Patient Load, IHS and
Tribal Direct and
Contract Hospitals

IHS services shifted away from inpatient care as demonstrated by the decline in average daily patient load (ADPL) between 1980 and 1993. However, the Tribal portion of total ADPL increased from 1 to 15 percent during that time period.

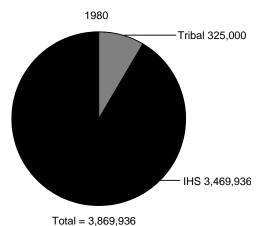

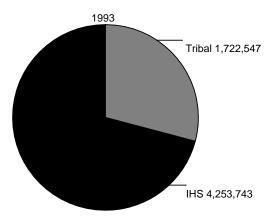

Total = 1,133

Chart 5.19
Trend in Number of
Ambulatory Medical
Visits, IHS and Tribal
Direct and Contract
Facilities

While inpatient services declined, ambulatory medical services increased 54 percent between 1980 and 1993. Also, the Tribal portion of total ambulatory medical visits increased from 8 to 29 percent during that time period.

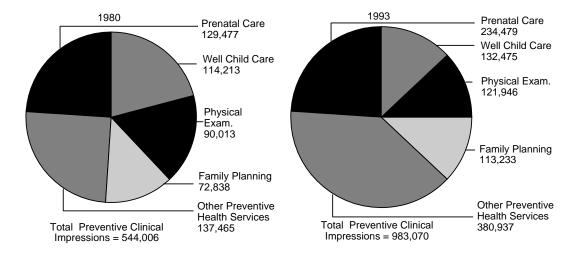

Total = 5,976,290

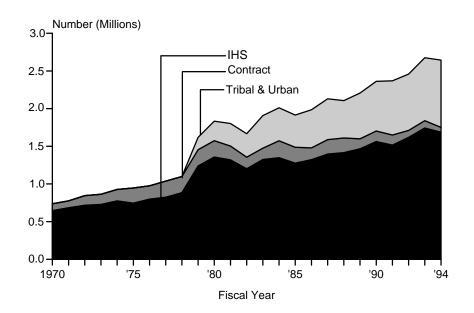

Chart 5.20
Trend in Preventive
Ambulatory Medical
Visits, IHS and Tribal
Direct and Contract
Facilities

IHS services related to preventive care have increased 81 percent since 1980. In 1993, the largest single category of preventive clinical impressions was prenatal care, 24 percent of the preventive total. These are conservative estimates since preventive activities also occur during visits reported for other causes.

## Chart 5.21 Dental Services Provided

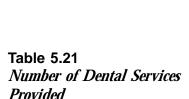

The number of direct and contract dental services provided by Indian Health Service, Tribal, and Urban Programs has increased 259 percent since FY 1970. In FY 1994 over 2.6 million dental services were provided.

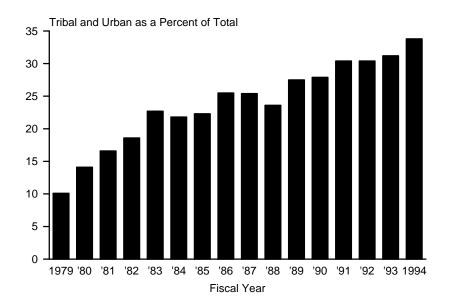

**Chart 5.22** Dental Services Provided by Tribal/Urban Programs

The number of dental services provided by Tribal and Urban Programs has increased 447 percent since FY 1979. In FY 1994, they comprised 33.8 percent of the total dental services provided, as compared to 10.1 percent in FY 1979.

by Tribes.

<sup>2</sup> Data systems were modified in 1960, 1966 and 1978. In 1978 the IHS began to use the dental services

<sup>2</sup> Data systems were modified in 1960, 1966 and 1978. In 1978 the IHS began to use the dental services. coding list adopted by the American Dental Association (ADA). The ADA list identifies individual clinical services. Previously the IHS had reported specified clinical services combined into major dental service groupings. Excluded from the 1978 count are diagnostic and adjunctive services. Excluded from the clinical counts since 1979 are diagnostic services other than examinations, revisits and non-clinical adjunctive services.

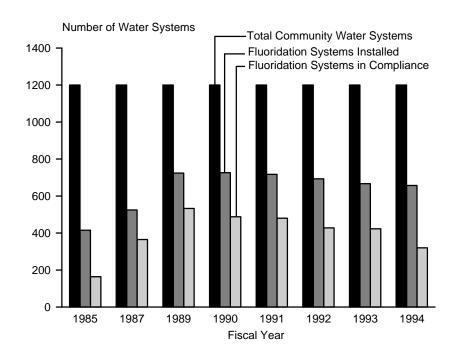

Chart 5.23

Trend in Community Water

Systems Monitoring

Fluoridation

Steady progress in maintaining at least minimally-acceptable levels of fluoride in community water systems has occurred since FY 1985. There are over 1,200 community water systems on reservations serving American Indian and Alaska Native people. In FY 1994, 642 water systems delivered fluoride for the entire year; of those systems, 308 were in compliance. A water system is considered to be in compliance for the year if the monthly water sample is in the optimal fluoride range. Optimally-fluoridated systems provide the dental benefits of this cost-effective public health measure to about 37 percent of the Indian population. Increasing the number of optimally-fluoridated water systems is a high priority for the IHS Dental and Office of Environmental Health and Engineering Programs.

## Chart 5.24 Annual Preventive Sealant Usage in IHS and Tribal Dental Programs, FY 1985-1994

Since FY 1985, there has been a dramatic increase in dental sealant usage. In FY 1985, there were only about 73,000 sealant services while in FY 1994 there were more than 275,000.
